Liturgy: Planning & Leading Worship in the Episcopal Church

This class includes a short presentation of how to go about deciding what to include in a Daily Office worship service, followed by modeling leading the worship designed in the presence of the group.

Each member of the group is then asked to choose and lead (for the group or the parish) a service included in the Daily Office series of worship. The student-led worship may be in a stand-alone setting, or used to begin/end each session of the "Overview of the Book of Common Prayer" extending the session times of that series' classes to approximately 1.5 hours.
